INDEXES TO ITEMS

IN

NICKEL BULLETIN, 1964

VOLUME 37

1. Subject Index (Technical Abstracts) 333-342

2. Corrigenda 343

3. Trade-Names, Materials and Processes 344

4. Name Index (Technical Abstracts) 345-347

5. Name Index (Patent Abstracts) 348

6. Subject Index (Patent Abstracts) 349-350

SUBJECT INDEX TO VOLUME 37

In the Index, the subjects are classified according to the section in which the items referred to appear in the Bulletin (**NICKEL, ELECTRODEPOSITION,** etc.). The reader seeking information should look first for the section covering the materials associated with the field in which he is interested, and then for the appropriate sub-section (within which the items are entered in alphabetical order). The page number given is that on which the abstract containing the particular reference begins.

Trade-Names, Materials and **Processes** referred to in this volume are listed on page 344.

NICKEL

Analysis

: Determination of Carbon 216
: Determination of Chromium 214
: Determination of Cobalt 214
: Determination of Copper 214
: Determination of Iron 214
: Determination of Manganese 214
: Determination of Silicon 214
: Determination of Tungsten 214
: Determination of Zinc 215

Determination

: in Aluminium 217
: in Brasses and Bronzes 217
: in Iron and Steel 38
: in Magnesium 217
: in the Presence of Chromium, Cobalt and Iron 62
: in the Presence of Copper 217
: in Residues 38
: in Thin Films 62
: of Nickel Carbonyl in Carbon Monoxide and Carbon Dioxide 218
: Simultaneously with Cobalt 218
: Simultaneously with Lead in Uranium 218
: with Bisbiacetylmonoxime-ethylenedi-imine 217
: with Bisbiacetylmonoxime-*o*-phenylenedi-imine 217
: with 2-Mercaptobenzothiazole 216
: with 8-Mercaptoquinoline 216

Composition, Properties and Structure

Barium-coated Nickel: Thermionic Emission 6, 7
Cadmium-Hydroxide Electrodes: Electrochemical Properties 278
Cathode Nickel 6, 92, 323
Chromium: Diffusion in Nickel 245
Corrosion Characteristics 180, 204, 247, 322, 323
Creep and Creep-Rupture Properties 39, 192, 195
Elastic Modulus 25
Electrochemical Behaviour 39, 122, 245, 246
Fatigue 56
Fuel-Cell Electrodes: Platinum-Metal Activation 281
Hot Ductility 157, 212
Irradiation: Influence on Nickel-Cadmium Battery Electrodes 213
Microplastic Behaviour of Polycrystalline Nickel 244
Mirror-Finished Nickel: Corrosion-Resistance 247
Nickel-Cadmium Batteries: Design Characteristics, Performance Data, Selection, Control, Charging and Servicing 7, 8, 40, 123, 180, 181, 213, 276-81
Nickel/Fluorine Reaction: Mechanism and Kinetics 180
Nickel-Hydroxide Electrode: Kinetics 276
Oxidation Behaviour 74, 180
Oxygen: Activity and Solubility in Liquid Nickel 157
Passivity: *see* 'Electrochemical Behaviour'
Recrystallization 63
Silicon: Activity in Nickel 5
Tungsten-Fibre-Reinforced Composites 244
Undercooled Nickel: Crystallographic Substructure 38
Young's Modulus at Temperatures above 1000°C 244

Nickel-clad Materials

Sealing of Anodic Films on Aluminium: Rôle of Nickel 40

Occurrence, Extraction and Refining

Thompson Project of The International Nickel Company of Canada, Limited 156-7, 298

Powder Production, Properties and Uses

(*For* Nickel and Nickel-Alloy Powders in Dispersion-Strengthening, *see* **HEAT- AND CORROSION-RESISTING MATERIALS: Powder Production, Properties and Uses**)

Advanced Techniques in Powder Metallurgy: Review 4
'Mond' Carbonyl-Nickel Powders 4
Nickel-Aluminide Coatings 294
Sintering of Nickel Powders: Volume and Grain-Boundary Diffusion 5

Processing

(*See also* **Welding**)

Deoxidation 62
Vacuum Melting 62
Zone Refining 63

Specifications

Analysis of Nickel for Use in Electron Tubes and Valves: *B.S.* 3727: 1964 214

Uses

(*See also* **Nickel Salts and Compounds,** *and* **ELECTRODEPOSITION**)

Corrosion-Resisting 180, 213
Electronic 6, 92, 191, 214, 323
Fuel Cells 281
Storage Batteries 7, 8, 40, 180, 181, 213, 276-81

Welding

128, 213

Nickel Salts and Compounds

(*See also* **ELECTRODEPOSITION**)

Electrochemical Behaviour of Nickel Compounds 122
Nickel-Aluminide Coatings 294
TiNi: Influence of Low-Temperature Phase Changes on Properties 5

ELECTRODEPOSITION AND OTHER COATING METHODS

Analysis of Solutions

Nickel Solutions
: Determination of Nickel and Cobalt 218
: Determination of Saccharin 219
: Determination of Trace Amounts of Copper and Zinc 284

Electrodeposition of Alloys

Nickel-Cobalt-Copper Alloys 125
Nickel-Iron Alloys 125
Tin-Nickel Alloys 47, 159

Electrodeposition of Nickel, and Properties and Uses of Electrodeposited Nickel

Addition Agents and their Effects 10, 41, 63, 182, 219, 220, 299
Annealing: Influence on Properties of Nickel Electrodeposits 299
Barrier Coatings, Nickel: Influence on Diffusion from Brass Substrates into Electrodeposited Tin Coatings 47
Black-Nickel Plating 299, 300
Brightening 44, 63
Cathodic Processes in Electrodeposition of Nickel 247
CEM Process: Wear Proofing of Cylinder Bores 159
Chromium Overcoatings: Deposition and Properties (*see also* 'Corrosion Protection' *below*) 42, 43, 44, 45, 126, 127, 128, 182, 220, 250, 282
Coloured Coatings 299, 300
Corrosion Protection Conferred by Nickel/Chromium Coatings, *including* Reviews *and* the Influence of Chromium and the Underlay 42, 43, 44, 124, 126, 127, 128, 129, 181, 182, 220, 282
Cylinder Liners, Cast-Iron: Pore-Free Nickel Plating 248
Dispersion-Hardened Coatings 128, 159
Double-Layer and Multi-Layer Nickel 9, 42, 43, 44, 45, 124, 126, 127, 128, 182, 282
Dual-Cell Plating Apparatus 45
'Dur-Ni': *see* 'Nickel-Seal' Plating
Electroforming, and Properties and Uses of Electroformed Components 41, 123, 128
Embrittlement of Zinc-Alloy Die Castings by Electrodeposits 249
Growth Habits of Electrodeposited Nickel 126
Heavy Nickel Plating 158
High-Speed Nickel Plating from Sulphamate Solutions 123, 124
Levelling 10
Mechanical and Physical Properties of Nickel Electrodeposits 123, 128, 299
Metallic Impurities in Nickel-Plating Solutions 284
Multi-Layer Coatings 45
Nickel-Iron Couples: Galvanic Corrosion 43
'Nickel-Seal' Plating 44, 45, 128, 182
Nuclear Energy: Applications of Nickel Plating 220
Primary Nickel: Behaviour as a Plating Material 282
Satin Nickel 44, 128
Stress in Electrodeposited Nickel 41, 123, 129, 219
Structure of Electrodeposited Nickel 126, 299
Titanium: Applications in Nickel/Chromium Plating 284
Uranium, Nickel-Plated: Stripping and Replating 248

Other Coating Methods

(*See also* **HEAT- AND CORROSION-RESISTING MATERIALS: Clad, Faced and Lined Materials**)

Electroless Nickel Plating
: Corrosion Behaviour of Deposit 46, 249
: Heavy Plating 158
: Mechanism 46
Vapour-Deposited Nickel Films 39

Specifications

Copper/Double-Layer-Nickel/Chromium Coatings on Zinc: *A.S.T.M. Designation B*405-63*T* 9
Nickel/Chromium Electrodeposited Coatings: *French Standard A*91-101 181

Testing

Accelerated-Corrosion Testing 42, 43, 44, 182, 299
Adhesion Testing 41
Atmospheric-Corrosion Testing 43, 44, 249, 299
Ductility Testing 41
Electrical-Resistance Method of Measuring Corrosion Rate 129
Hardness Testing 40
Porosity Testing 42
Rating of Coating Systems 127
Stress, Determination of 41
Thickness Testing 41
X-Ray Determination of Residual Stress 129

NON-FERROUS ALLOYS

(*See also* **HEAT- AND CORROSION-RESISTING MATERIALS**)

Analysis

Determination of
: Carbon 216
: Lead 53
: Nickel in the Presence of Copper 217
Simultaneous Determination of Nickel and Cobalt 218

Composition, Constitution, Structure

Aluminium Bronzes 63, 64, 93, 94, 300
Chromium-Nickel Alloys: Structure at High Temperatures 160
Copper-Manganese-Aluminium-Nickel Alloys 221
Copper-Nickel-Zinc Alloys 185
Gunmetals 48, 65, 92, 184
Molybdenum-Nickel System: Equilibrium Diagram 250
Nickel-Aluminium Alloys 160
Nickel-Copper Alloys 165
Nickel/Platinum-Group-Metal Alloys 130
Nickel-Tin Bronze 161
Nickel-Titanium Alloys: Precipitation in 101, 185
Phosphorus: Influence on Gunmetals 92
'Stellite' Alloys: Influence of Nickel and Molybdenum on Properties 160

General

Quality Scheme for the Bronze Foundry Industry 10

Powder Production

(*See also* **HEAT- AND CORROSION-RESISTING MATERIALS: Powder Production**)

Advanced Techniques in Powder Metallurgy: Review 4
Copper-Nickel System: Homogenization 184

Production and Processing

(*See also* **ELECTRODEPOSITION: Electrodeposition of Alloys**)

Aluminium Bronzes 63, 93
Gunmetals 48, 65, 92, 184
Nickel-Tin Bronze 161
Nickel-Titanium Alloys
: Age Hardening 185
: Machinability 186
Production of Nickel Alloys at the Hereford Works of Henry Wiggin & Company, Ltd. 130
Quality Scheme for the Bronze Foundry Industry 10
Thermocouple Probes: Manufacture 66

Properties

(*See also* **Specifications**)

Aluminium Bronzes
: Corrosion Behaviour 64, 93, 300
: Soundness of Castings and Reproducibility of Properties 63
: Use for Dies and Plungers in the Glass Industry 94, 301
Atmospheric-Corrosion Behaviour 323
Condenser-Tube Alloys: Corrosion Behaviour 26
'Constantan'
: Electrical Resistance over the Range 10-380°K 66
: Heat Capacity at Low Temperatures 10
Copper-Manganese-Aluminium-Nickel Alloys: High-Temperature Properties 221
Copper-Nickel Alloys, Tungsten-Fibre-Reinforced 244
Copper-Nickel-Zinc Alloys
: Electrochemical Studies 26
: Young's Modulus 185
Cupro-Nickels 26, 74, 165, 196, 221, 225, 329
'Cupron' (*see also* 'Constantan'): Temperature Coefficient of Resistance 25, 66
'Evanohm': Temperature Coefficient of Resistance 25, 66
Gunmetals 10, 48, 65, 92, 184
'Karma': Electrical Resistance at 10-380°K 66
'Manganin'
: Heat Capacity at Low Temperatures 10
: Temperature Coefficient of Resistance 25, 66
Nickel-Aluminium Alloys: Thermodynamic Activities 160
Nickel-Cobalt-Chromium Alloys: Dynamic Magneto-strictive Properties 11
Nickel-containing Copper Alloys: Review 221
Nickel-Copper Alloys 165, 221
Nickel/Platinum-Group-Metal Alloys: Mechanical Properties 130
Nickel Silvers 131, 152, 221, 284
Nickel-Tin Bronze: Influence of Phosphorus on Ageing Behaviour 161
Nickel-Titanium Alloys 185, 186
Spring Materials 152, 191
'Stellite' Alloys: Influence of Nickel and Molybdenum on Mechanical Properties 160

Specifications 63, 225

Uses
(*For* Uses in Nuclear-Energy Plant and in Brazing Alloys, *see* **HEAT- AND CORROSION-RESISTING MATERIALS: Uses**)
Architectural 131, 221
Corrosion-Resisting 64, 93, 300, 329
Dies 94, 301
Electrical and Electronic Applications 10, 11, 66, 225
Heat-Exchange 26, 74, 196
Marine Cable 329

Welding
Cupro-Nickels 132
Nickel Silvers: Welding and Brazing for Use in Architecture 131, 221
Repair Welding of Copper-base Castings 132

NICKEL-IRON ALLOYS

Analysis
Thin Films: Spectrophotometric Determination of Micro-Amounts of Nickel, Iron and Cobalt 62

Composition, Constitution, Structure and Properties (*excluding* **Magnetic Properties**, *q.v.*)
Age Hardening in Iron-Nickel Martensites 50, 98
'Alni' Alloys: Temperature Regions for Homogeneous and Heterogeneous Structures 187
'Alnico' Alloys
: Grain Growth in 302
: Replicating Technique for Studying Structural Changes 95
: Temperature Regions for Homogeneous and Heterogeneous Structures 187
Carbide Precipitation in Tempered Martensite 98
Columnar Crystallization 301
Fracture Characteristics 49
Glass-to-Metal Sealing Alloys 11, 12
'Invar' Effect 186
'Invar': Oxidation in a Magnetic Field 13

Tubing: Stress-Rupture Testing 23

Uses

(*see also* **Specifications**)

Uses grouped in this sub-section are individually referred to in the **Properties** sub-section, in relation to the properties which render the materials suitable for the respective applications.

Aircraft, *including* Structural Uses and Rockets and Missiles (*see also* Gas Turbines) 30, 54, 69, 81, 104, 105, 106, 118, 128, 143, 162, 208, 209, 231, 266, 317, 318, 320, 322, 328, 329
Architectural and Constructional 80, 131, 221, 260, 263, 267, 288, 291, 323
Automobile Industry 263, 264, 265
Brazing Alloys 80, 105
Chemical, Petrochemical and Petroleum Industries 13, 14, 57, 58, 59, 64, 79, 82, 115, 148, 196, 202, 213, 221, 238, 263, 285, 321, 327
Dies and Moulds 94, 301
Domestic Appliances 263, 284
Electrical-Resistance Alloys 10, 25, 66, 225, 255
Electronic Applications 191
Fasteners 151, 263, 329
Gas Turbines 21, 22, 23, 24, 81, 82, 102, 103, 108, 109, 110, 130, 146, 150, 151, 193, 194, 195, 197, 199, 201, 202, 206, 208, 209, 225, 226, 228, 230, 232, 254, 255, 256, 291, 317, 318, 320
Low-Temperature Service 25, 31, 66, 118, 167, 222, 290, 303, 314
Marine Applications 93, 132, 202, 248, 260, 263, 329
Nuclear-Power Plant 30, 53, 54, 58, 75, 76, 79, 103, 107, 117, 151, 153, 180, 196, 199, 202, 203, 220, 248, 255, 261, 324, 325
Springs 95, 151, 152, 191
Steam Plant 15, 23, 26, 27, 65, 74, 83, 108, 109, 110, 111, 112, 113, 114, 132, 172, 198, 199, 201, 221, 230, 231, 233, 258, 263, 293, 322, 323, 326
Thermocouple Alloys 66, 199
Tubing for Flexing Applications 208
Valves and Pumps 13, 16, 57, 65, 285

Welding, Brazing and Soldering

(*See also* **Specifications**)

60-40 Chromium-Nickel Alloy: Welding to Low-Carbon and Stainless Steels 172
Brazing and Brazing Alloys 80, 105
Bulk Process Welding 31
Corrosion Behaviour of Weldments 58, 203, 261, 327
Cracking in Weldments 22, 83, 107, 326, 327
Diffusion across Ferritic-Steel/Austenitic-Steel Joints 152

Low-Temperature Properties of Welded Materials 167, 290, 314
Nickel-base Welding Electrodes for Low- and High-Temperature Service 314
'Nimonic' Alloys: Resistance Seam Welding 81, 208
: Spot Welding 82, 209
Power-Plant Construction: Welding of Austenitic Steels for 83
Precipitation-Hardenable Stainless Steels: Welding Procedures 107, 208, 265, 266, 328
'René' 41: Welding and Brazing 105, 256
'René' 62: Welding 22
Resistance Alloys: Welding 255
Resistance Seam Welding of Stainless Steels 172
Site Welding of a Piping System in 'Incoloy' DS 82
Stainless-Steel Thin Sheet: Brazing 105
Steel Castings: Welding 328
Strain-Age Cracking 22, 107
Tubing: Properties of Welded 23
Tubular Stainless-Steel Electrodes 294
Type 316L Weldments: Achievement of Corrosion-Resistant Weld Metal 327
'Udimet' 700: Formation of Eutectic Structure in the Heat-Affected Zone 208
: Properties of Weldments 317

CORRIGENDA TO ITEMS IN VOLUME 37

Issue No. 1-2, p. 35.
Heterogeneous Sintered Nickel-base Creep-Resisting Alloys.
For *French Pat.* 1,331,625,
Read *French Pat.* 1,331,626.

Issue No. 5, pp. 92-3.
Influence of Phosphorus on Nickel-containing and Nickel-free Gunmetals, page 93, line 11.
For 'melt under reducing conditions, scavenge with oxygen',
Read 'melt under reducing conditions, scavenge with nitrogen'.

Issue No. 9, p. 223.
Feasibility of Substituting Manganese for Nickel in Nickel-Chromium-Molybdenum Submarine-Hull Steels.
For S. G. MANGANELLO,
Read S. J. MANGANELLO.

Issue No. 10, p. 268.
Electrodeposition of a Nickel-Manganese Alloy Suitable for Electroforming Applications, line 6.
For 'a current density of 220-800 A./dm.^{2}',
Read 'a current density of 220-800 A./m.^{2}'.

Issue No. 12, pp. 304-5.
5%Ni-Cr-Mo-V Steel: Influence of Chromium Content on the Toughness and Transformation Characteristics of the Heat-Affected Zone, p. 305, left-hand column, 4th line below table.
For 49·5 kg./mm.^{2},
Read 98·5 kg./mm.^{2}.

Issue No. 12, pp. 306-7.
5%Ni-Cr-Mo-V Steel: Production and Properties of Plate, p. 307, conclusion 3, line 6.
For (31 ton/in.^{2}: 49 kg./mm.^{2}),
Read (62 ton/in.^{2}: 98 kg./mm.^{2}).

Issue No. 12, pp. 307-8.
Evaluation of Maraging Steels for Submarine-Hull Applications Requiring a Yield Strength of 180,000-210,000 lb./in.^{2}, p. 307, first paragraph, lines 6-7, *and* p. 308, right-hand column, conclusion 7, lines 5-6.
For (42·5 ton/in.^{2}: 67 kg./mm.^{2}),
Read (85 ton/in.^{2}: 133·5 kg./mm.^{2}).

TRADE-NAMES, MATERIALS AND PROCESSES
Referred to in Nickel Bulletin, Volume 37, 1964

Zirngiebl, E. 33.

PATENTS: SUBJECT INDEX

The titles of the patent abstracts are classified below according to the material or field to which the patent relates.

Nickel

Coin Blanks: Production from Carbonyl-Nickel Pellets 84
Nickel Thermionic-Cathode Alloys 173
Photoconductolithography Employing Nickel Salts 32

Electrodeposition and Other Coating Methods

Aluminium: Nickel Plating 33
Aluminium: Nickel/Chromium Plating 173
Bright-Nickel/Microporous-Chromium Electrodeposits: Production from Solutions Containing Solid Particles 268
Bright-Nickel/Microporous-Chromium Electrodeposits: Production Using Emulsified Nickel- or Chromium-Plating Solutions 267
Copper-Nickel-Alloy Foil: Electrodeposition 268
Electroless Nickel: Method of Stripping from Transformer Parts 84
Nickel-Boron Electrolessly Deposited Coatings 32, 33
Nickel-Manganese Alloy Suitable for Electroforming Applications: Electrodeposition 268
Nickel/Rhodium Protective Coating for Refractory Metals 269
Three-Layer Nickel Electrodeposits 32
Uranium: Nickel Plating 33
Wear-Resistant Nickel Coatings Containing Dispersions of Mica: Electrodeposition 32, 173

Non-Ferrous Alloys

Copper-Nickel-Manganese Alloy with High Damping Capacity at 50-300°C. 173
Nickel-Copper-Alloy Welding Electrode 89

Nickel-Iron Alloys

'Alnico' Alloys: Method of Hot Working 174
Gold-containing Nickel-Iron Soft Magnetic Alloy 173

Cast Iron

S.G. Iron which is Wholly Pearlitic As-Cast 174

Constructional Steels

Low-Alloy High-Strength Steels: All-Position Welding by the Short-Arc Process 272
Low-Alloy-Steel Submerged-Arc Weld Metal Exhibiting High Tensile Strength and Ductility at Low Temperatures 89
Maraging Steel, Cast 174
Maraging Steel for Low-Temperature Service 174
Nickel-containing Low-Alloy Steel Offering a Desirable Combination of Properties in the Hot-Rolled Condition 174
Welding Electrodes for 9% Nickel Steel 272

Heat- and Corrosion-Resisting Materials

Age-Hardenable Nickel Steels Exhibiting High Hardness and Corrosion-Resistance 87
Age-Hardenable Non-Magnetic Austenitic Steels 87
Austenitic Alloy Suitable for Exhaust Valves 272
Austenitic Heat-Resisting Steels 270
Austenitic Steel for Nuclear-Reactor Structures 177
Cast Austenitic Steel with High Wear-Resistance and Ductility at High Temperatures 270
Copper-base Alloy Suitable for Brazing Nickel-base High-Temperature Alloys 88
Diffusion Bonding *via* Beryllium-containing Alloys 88
Dispersion-Hardened Materials 84, 85
Filler Rod for Welding Stainless Steels for Cryogenic Applications 177
Filler Rods for Gas-Shielded Arc Welding of Austenitic Steels to Non-Austenitic Steels 178
Forgeable Nickel-base Alloy for Engine Components 176
Free-Machining Stainless Steels Containing Sulphur and Aluminium 36
Gold-Palladium-(Nickel) High-Temperature Brazing Alloy 178
Heat-Treatment of Nickel-base High-Temperature Alloys 177
Heat-Treatment to Improve the High-Temperature Impact Strength of Nickel-base Alloys 86
Heterogeneous Sintered Nickel-base Creep-Resisting Alloys 35, 85
Hot Working Nickel-Chromium-base Age-Hardenable Alloys 87
Iron-Aluminium-Manganese-Nickel Alloys 88, 175
Iron-Nickel-Chromium-base Alloy for Furnace Parts 176
Iron-Nickel-Chromium Heat-Resisting Precision-Casting Alloy 271
Manganese-Nickel-Cobalt Brazing Alloy Resistant to Age Hardening at High Temperatures 178
'Monel' Cladding on Steel: Bare Filler Wires for Argon-Arc Welding 273
Nickel-base Alloy Resistant to Oil-Ash Corrosion 272
Nickel-base Alloys Exhibiting Improved Tensile Properties at High Temperatures 176
Nickel-base Casting Alloy for Turbine Blading 175
Nickel-base Creep-Resisting High-Temperature Casting Alloys 176
Nickel-base High-Temperature Alloy with Improved Resistance to Corrosion by the Combustion Products of Impure Fuel 176
Nickel-base High-Temperature Brazing Alloy 88
Nickel-base High-Temperature Casting Alloy 271
Nickel-Chromium-Alloy Filler Wire for Shielded-Arc Welding 88
Nickel-Chromium-base Age-Hardenable Alloys 33
Nickel-Chromium-base Creep-Resisting Alloys Produced by Powder Metallurgy 271
Nickel-Chromium-base High-Temperature Alloy Hardened by Niobium and Aluminium 34, 271
Nickel-Chromium-base High-Temperature Alloy with High Strength at Room Temperature 34, 175
Nickel-Chromium-base High-Temperature Casting Alloy Containing Cobalt 34, 176
Nickel-Chromium-Cobalt Alloys for Use in Sheet Form 35
Nickel-Chromium-Cobalt-base Alloys for Use at 1000°C. and Above 271

Nickel-Chromium-Cobalt High-Temperature Alloys 86
Nickel-Chromium-Iron Alloys for Components Used In the Production of Glass Fibres 272
Nickel-Chromium-Iron-base Alloys Resistant to High-Temperature Embrittlement 86
Nickel-Chromium-Molybdenum Alloys with Improved Resistance to Intergranular Corrosion 176
Nickel-Chromium-Molybdenum-base Alloy with Good Creep Resistance 175
Nickel-Chromium-Molybdenum-base Alloy with Good High-Temperature Impact Strength 34
Nickel-Chromium-Molybdenum Steel for Rolling-Contact Bearings 269
Nickel-Chromium-Tungsten-base High-Temperature Alloy 175
Nickel-Chromium-Tungsten High-Temperature Casting Alloy 271
Nickel-Copper-Alloy Wire for Brassière Frames 269
Nickel-Germanium-Chromium-Palladium-Copper High-Temperature Brazing Alloy 36
Nickel-Hafnium High-Temperature Alloy 173
Nickel/Rhodium Protective Coating for Refractory Metals 269
Niobium-Nickel Low-Melting-Point Addition Alloy 33
Precipitation-Hardenable Stainless Steels Heat-Treatable to High Strength by Simple Low-Temperature Procedures 269-70
Precipitation-Hardenable Stainless Steels with High Strength at Room Temperature and High Temperatures 35, 174
Sealing Welds in Tanks by Gas Plating *via* Nickel Carbonyl 88
Silicon-containing Austenitic Stainless Steel Resistant to Stress Corrosion 177
Solution-Treatment for a Nickel-Chromium-Cobalt Sheet Alloy 86
Stainless-Steel Fourdrinier Wire 36
Weldable Heat-Resisting Cast Austenitic Steel 177
Welding Electrode for Depositing Fully Austenitic Welds with High Fatigue-Resistance 177
Welding Electrodes for Deposition of Overlays in Type 316 and 317 Stainless Steels 36
Workable Manganese-Nickel-Copper Brazing Alloy 272
Workable Nickel-base High-Temperature Alloy 35
Workable Nickel-Cobalt-Chromium-Iron-base Gas-Turbine Alloy 35
Zirconium-containing Glass-to-Metal Sealing Alloy Producing Bubble-Free Seals 269

© *The International Nickel Company (Mond) Limited 1964*

Attention is drawn to the fact that many of the names of materials mentioned in The Nickel Bulletin are *Trade Marks*.
